Description

Outpatient Opioid and Alcohol Addiction Treatment

At SaVida Health Bennington, we provide **compassionate, evidence-based treatment** for individuals struggling with opioid and alcohol addiction. Our outpatient program combines **FDA-approved Medication-Assisted Treatment (MAT)** with personalized counseling, case management, and real-world support to help you build a healthier, more stable future. Whether you're starting your recovery or continuing care, our team is here to support you every step of the way.

Personalized Treatment Plans That Work

Recovery isn't one-size-fits-all. That's why our licensed providers develop **individualized treatment plans** based on your unique needs, goals, and lifestyle. We offer:

- MAT using **Suboxone®, Buprenorphine, Sublocade®, and Vivitrol®**

- **One-on-one and group counseling** for emotional and behavioral support

- **Case management** to assist with transportation, housing, child care, and employment

- **Ongoing support** for relapse prevention and long-term recovery

Integrated Care for the Whole Person

Our Bennington clinic is focused on treating the **whole person**, not just the addiction. We help patients manage co-occurring mental health conditions and provide access to **wraparound services** that reduce barriers to care.

Some SaVida locations, including Bennington, may also offer **Intensive Outpatient Programs (IOPs)** for patients who need more structured support while continuing to live at home.

Flexible, Accessible Outpatient Care

We understand the importance of access and timing when you're ready for help. That's why SaVida Health Bennington offers:

- **Same-day and next-day appointments** when available

- **Telehealth services** for eligible patients

Quick insurance verification and paperwork assistance

We accept **Medicaid, Medicare, and most private insurance plans**, and we're committed to helping you start treatment without delay.
