Outpatient Opioid Addiction Treatment with Personalized Support

At **SaVida Health Springfield**, we provide outpatient treatment for opioid addiction that combines **FDA-approved medications** with practical support and compassionate care. Our local team of licensed professionals is dedicated to helping you achieve stability and move forward on your own terms.

Personalized Medication-Assisted Treatment (MAT)

Recovery is not one-size-fits-all. That's why we begin each treatment plan with a thorough medical assessment to determine the right course of care for you. We offer:

- **Buprenorphine-based treatments**, including **Suboxone®**, **Zubsolv®**, **Bunavail®**, and **Sublocade®**

- **Naltrexone/Vivitrol®** as a non-opioid option

Ongoing medication management and dose adjustments as needed

These treatments reduce cravings and withdrawal symptoms, allowing you to focus on the bigger picture: rebuilding your life.

Flexible Outpatient Services That Work for You

Our Springfield clinic offers **outpatient care**, allowing you to receive treatment without needing to leave home, work, or school. We offer:

- **Same-day or next-day appointments**

- **Flexible scheduling and telehealth options**

- **Quick insurance verification and help with paperwork**

No requirement for overnight stays or inpatient admission

Support Beyond the Prescription

We understand that recovery doesn't stop at medication. Our team provides **case management and wraparound services** to support you throughout your journey. We can assist with:

- **Housing and transportation coordination**

- **Child care resources**

Employment or legal support referrals

Our goal is to remove obstacles so you can focus fully on your recovery.
